

## Brief CV

<b>Name</b>	Chou Pui May	中文名		
<b>Gender</b>	Female	<b>Title</b> (Pro./Dr.)	Dr.	
<b>Position</b> (President...)	Programme Director in The School of Engineering	<b>Country</b>	Malaysia	
<b>University/ Department</b>	Taylor's University Lakeside Campus, Malaysia / School of Engineering			
<b>Personal Website</b>	Not available			
<b>Research Area</b>	Nanomaterials, Biopolymers			
<b>Brief introduction of your research experience:</b>				
<p>I started doing research on biopolymers to be used as bone cement during my final year project at University of Science Malaysia. Upon graduation, I continued my Master study in research mode at the same University, focusing on the improvement of poly(lactic acid) for biomedical application. After that, I pursued my PhD study in Engineering at The University of Nottingham, Malaysia Campus. My PhD research was to develop a thermoresponsive microcarrier for cell culture application. Currently, my research area is mainly focused on the production of nanocellulose from agricultural waste.</p>
