

Brief CV

Name	Nurjannah Salim	中文名		
Gender	Female	Title (Pro./Dr.)	Dr.	
Position (President...)	Senior lecturer	Country	Malaysia	
University/ Department	Material Technology, Universiti Malaysia Pahang			
Personal Website	http://fist.ump.edu.my/index.php/en/			
Research Area	Polymer composite, wood plastic composite, surface coating			
Brief introduction of your research experience:				
<p>Dr. Nurjannah Salim is a Senior lecturer in the Faculty of Science & Industrial Technology at Universiti Malaysia Pahang. Her research interest are in the field of Wood Science and Technology, specialized in wood composite and properties of lignocellulosic based composites, properties of components of bioresources in relation to panel production and protective functional components of plant biomass. The key strategy in her research activities is to develop new composite from green material such as lignocellulose fiber. Her main current research interest deals with the development and application green wood plastic composite materials as alternatives material such as furniture. The outcomes of her research has been presented and published in many article journals on materials study, polymer composite at various international and national refereed journals, symposiums and conferences.</p>
